### ***EXAMINER'S AMENDMENT***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- The following changes to the drawings have to be done: a set of formal drawings without handwriting characters and crossed Japanese characters should be submitted.

In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

### ***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance:

- With regard to independent claims 1 and 4; as the closest reference on record, Park (US 6,005,831) discloses a disk identifying device including: a belt-like portion concentrically formed on a rear surface of the rotary tray, the belt-like portion having disk detecting holes each corresponding to a position of each of the disk placing portions; **but fails to show** that reflecting areas each formed between adjacent disk detecting holes and including slanting reflecting faces and flat reflecting faces which are divisionally arranged so that their arrangement patterns are different for each of the assigned numbers of the disk placing portions.

Art Unit: 2656

- With regard to independent claims 2 and 5; as the closest reference on record, Park (US 6,005,831) discloses a disk identifying device including: a belt-like portion concentrically formed on a rear surface of the rotary tray, the belt-like portion having disk detecting holes each corresponding to a position of each of the disk placing portions; **but fails to show** light-receiving areas each formed between adjacent disk detecting holes and including light-absorptive color light-receiving faces and light-reflective color light-receiving faces which are divisionally arranged so that their arrangement patterns are different for each of the assigned numbers of the disk placing portions.
- Applicant assumes that this invention has been accomplished to provide a disk identifying device simplified in structure and reduced in costs by applying a configuration rotary tray rotary position detecting means corresponding to a rotary sensor and a disk presence/absence detecting means commonly used (Specification, p. 8).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tianjie Chen whose telephone number is 571-272-7570. The examiner can normally be reached on 8:00-4:30, Mon-Fri.
